Hi David and Bob,

Wayne and I have reviewed the reclamation cost calculations, and here are what I assume will be our last comments.

- 1) Summary Page - Change the rate of escalation to 1.9% (0.019), consistent with the Division's 2014 rate.
- 2) Earthwork - Calculations for the cost of ripping the three graded waste rock dumps need to be provided, consistent with the reclamation plan.
- 3) Earthwork - The west OK stockpile ripping calculations appear to have been removed, since it looks like the acreage of the entire Mill, Ponds & OK Stockpile are should have increased 5.7 acres from the approved 2012 reclamation calculations. If so, replace the ripping cost for the west OK stockpile. I don't think your most recent response accounted for this. Let me know if you see it differently.

I'll be in today and tomorrow to review anything else. Call if there are questions.

Peter
